1 Document Control

Field	Value
Document ID	SYS-DD-001
Revision	1.0
Status	Approved
Date	2026-08-20
Author	Engineering Documentation Team
Organization	〇〇株式会社

2 **Lists**

- Level 1 bullet
 - Level 2 bullet
 - Level 3 bullet
- 1. First numbered item
- 2. Second numbered item
 - 2.1 Nested numbered item

3 Table

表 1 Table Caption

Parameter	Description	Default
Timeout	Timeout 1. This cell intentionally contains a long description that should wrap naturally inside the table cell.	30 s
Retry	Retry count. Line oneLine two.	3
configPath	C:\Program Files\Example\config.yaml	system default

Parameter	Description	Default
page_split_01	Long table row sample 01. This intentionally long cell validates wrapping and page split behavior.	1
page_split_02	Long table row sample 02. This intentionally long cell validates wrapping and page split behavior.	2
page_split_03	Long table row sample 03. This intentionally long cell validates wrapping and page split behavior.	3
page_split_04	Long table row sample. This intentionally long cell validates wrapping and page split behavior.	4
page_split_05	Long table row sample 05. This intentionally long cell validates wrapping and page split behavior.	5
page_split_06	Long table row sample 06. This intentionally long cell validates wrapping and page split behavior.	6
page_split_07	Long table row sample 07. This intentionally long cell validates wrapping and page split behavior.	7
page_split_08	Long table row sample 08. This intentionally long cell validates wrapping and page split behavior.	8

Parameter	Description	Default
page_split_09	Long table row sample 09. This intentionally long cell validates wrapping and page split behavior.	9
page_split_10	Long table row sample 10. This intentionally long cell validates wrapping and page split behavior.	10
page_split_11	Long table row sample 11. This intentionally long cell validates wrapping and page split behavior.	11
page_split_12	Long table row sample 12. This intentionally long cell validates wrapping and page split behavior.	12
page_split_13	Long table row sample 13. This intentionally long cell validates wrapping and page split behavior.	13
page_split_14	Long table row sample 14. This intentionally long cell validates wrapping and page split behavior.	14
page_split_15	Long table row sample 15. This intentionally long cell validates wrapping and page split behavior.	15
page_split_16	Long table row sample 16. This intentionally long cell validates wrapping and page split behavior.	16
page_split_17	Long table row sample 17. This intentionally long cell validates wrapping and page split behavior.	17
page_split_18	Long table row sample 18. This intentionally long cell validates wrapping and page split behavior.	18
page_split_19	Long table row sample 19. This intentionally long cell validates wrapping and page split behavior.	19
page_split_20	Long table row sample 20. This intentionally long cell validates wrapping and page split behavior.	20

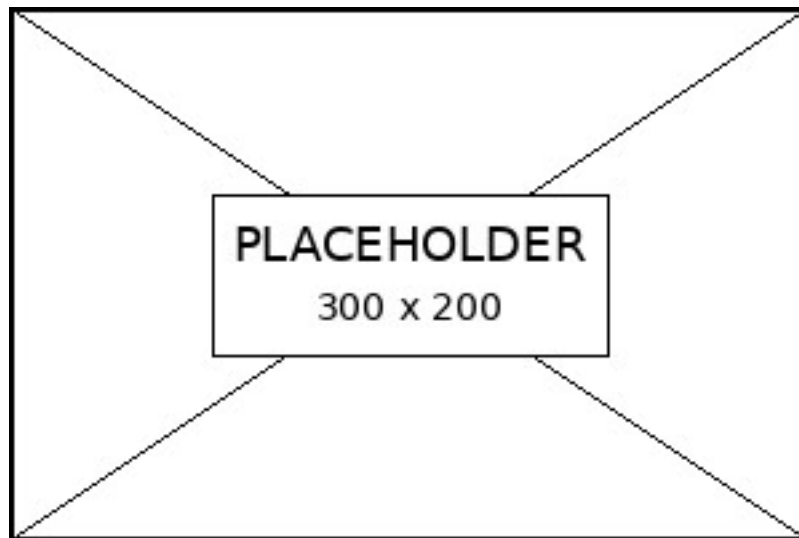

4 Code

Inline Code: `example_function()` and `C:\Program Files\Example\config.yaml`.

コード 1 Source Code Sample

```
function example() {  
  const configPath = "C:\Program Files\Example\config.yaml";  
  return configPath.length > 0;  
}
```

5 Figure And Caption

 1 *Figure Sample*

6 **Footnotes And Links**

See Pandoc for reference-doc behavior.¹

¹ Footnote Text. The reference number should be superscript.

7 TOC Levels

7.1 Heading 2

7.1.1 Heading 3

7.1.1.1 Heading 4

7.1.1.1.1 Heading 5

7.1.1.1.1.1 Heading 6

8 Equation

$$E = mc^2$$

9 Definition List

Timeout

Request timeout in seconds.

Retry

Retry count before failing .

10 Notes

NOTE: Provides supplementary information and reference details.

TIP: Provides recommendations for improving work efficiency.

IMPORTANT: Provides important information that must be reviewed.

WARNING: Provides information about conditions that may result in serious failures or losses.

CAUTION: Provides operational precautions and information about minor risks.
